Agriculture

PROJECT TITLE	SIMILAR
Web Based Registration Process	**Rhode Island: Agriculture Product Online Renewal** http://www.nascio.org/awards/nominations/2009/2009RI4-NASCIORecognitionAward2009.pdf "The program has saved DEM employees hours previously devoted to data entry and mail handling. During the 2009 renewal cycle (September – February 2008) RII accommodated over 1,100 companies registering over 14,200 products – products that previously would have been manually entered into the DEM database. Over $2 million was collected and automatically remitted to the state – revenue that previously would have been sent by paper check, reconciled, deposited, and vouchered in the state accounting system by DEM employees."

ITO 1-14 – MPD - Replace or Upgrade Customer Relationship Management (CRM) System	**West Virginia: CALL WVA Tourism Information Services** http://www.nascio.org/awards/nominations/2001WestVirginia7.doc "The Division of Tourism's new CALLWVA system is the nation's most advanced Customer Relations Management (CRM) program devoted specifically to tourism. West Virginia can now provide personalized responses, with information that is updated literally minute-by-minute, to anyone interested in travel and recreation in the Mountain State. All information on events, activities, lodging, dining, shopping, etc. is now consolidated in a central database. Furthermore, all of this information is instantly available, and can be distributed by any means the customer prefers." **Kansas: Applying Customer Relationship Management Technology to the Art and Science of Economic Development at the Kansas Department of Commerce** http://www.nascio.org/awards/nominations/2009/2009KS2-Kansas-CrossBoundary-CRM-AwardNomination.pdf "The Kansas Department of Commerce is charged with leveraging state resources to expand the state economy at all levels. Our business development "tool-set" includes dozens of programs to provide economic assistance and incentives to companies and communities. Programs were historically managed by dozens of "home grown" Microsoft Access databases and spreadsheets. It took a reporting requirement and a customer complaint to bring focus to our need for a new design. In 2007, the legislature sent over a request for a report on our activities, by county, for the previous 5 years and their impacts. Two weeks later we were still trying to merge the data. Meanwhile, across the state, two Commerce representatives from different divisions were visiting the same company, on the same day, with the same questions. The company left us with an important quote: "Don't you folks ever talk to each other?!!""
ITO 2-5 MPD - Tourism Client Interface	**Oklahoma: Agency Content Management System** http://www.nascio.org/awards/nominations/2005Oklahoma6.pdf "OK.gov's Agency Content Management System (CMS) provides a means for state agencies to create and publish Web sites that meet the state's accessibility and design standards set by the Oklahoma Office of State Finance. The system is built to enable agency staff to easily create and maintain agency Web sites through a Web-based interface that is available 24/7/365 from any computer with Internet access. Agency staff can handle all additions or edits through a secure administrative module that grants various user rights, modeled after the state of Oklahoma's security standards."

PROJECT TITLE	SIMILAR
	IN.gov Redesign & CMS Implementation http://www.nascio.org/awards/nominations/2007/2007IN8-Indiana_Portal.pdf "Indiana felt it was time to make things easier for state government employees. The former cumbersome processes for content changes and website redesigns are eliminated with a CMS that allows for quick, immediate content updates and enforces cascading style sheets. The addition of a robust web analytics tool allows state employees to better analyze the strengths and weaknesses of their site's content; while the introduction to the new frequently asked questions software provides agencies the ability to quickly post meaningful and relevant information on to their homepages."

Integrated Justice Information System (IJIS) Broker	**Nevada: Multi-County Integrated Justice Info System** http://www.nascio.org/awards/nominations/2002Nevada5.doc "The mission of the Multi-County Integrated Justice Information System (MC-IJIS) is to create and maintain an accessible, and appropriately secured, integrated criminal justice information system, consisting of open-standards components that meet the operational needs of the various agencies and courts within the counties, while providing accurate, complete, and timely data on individuals and events to criminal justice and noncriminal justice information users that supports effective administration of the criminal justice system, public and officer safety, public policy management, and reporting to state repositories in a timely and cost-effective manner."

PROJECT TITLE	SIMILAR
	Colorado: Integrated Criminal Justice Information System http://www.nascio.org/awards/nominations/2002Colorado4.doc "The vision of the Colorado Integrated Criminal Justice Information System is to provide the right information to the right people at the right time and place in the criminal justice process. CICJIS continually strives to provide timely, accurate information reliably. CICJIS is made up of electronic services or functions – the entire program consists of electronic services that maximize standardization of data and communications technology among the five agencies. CICJIS has been recognized as one of the most advanced and successful integrated criminal justice information systems in the country."
Integrated Justice Information System (IJIS) Broker Continued	**Arkansas: eOMIS/JusticeXchange** http://www.nascio.org/awards/nominations/2005Arkansas4.doc "The Arkansas Department of Community Correction (DCC) and the Arkansas Crime Information Center (ACIC) have implemented a system utilizing the resources of two of the State's premier web-based Justice Information Systems. The system uses IBM's MQ Series to trigger notification to the appropriate contact whenever critical events occur affecting offenders on probation or parole. Booking incidents on probationers or parolees trigger automatic email notification to the supervising officer. Additionally, all booking facilities and law enforcement agencies are notified of previously entered cautions and warnings whenever an incident occurs on probationers or parolees. Photographs of the offender are exchanged automatically during these incidents. This information is available to all participating law enforcement agencies throughout the State of Arkansas, plus twenty four other states."

DDP Subsystem Maintenance and Support	**Nothing Similar**
Healthy Montana Kids (HMK)	**Virginia: Using Technology to Improve Children's Health** http://www.nascio.org/awards/nominations/2005Virginia3.pdf "This year, two Commonwealth of Virginia agencies partnered in a technology initiative to significantly increase participation in Family Access to Medical Insurance Security Plan (FAMIS, http://www.famis.org), the state's free or low-cost insurance program for uninsured children. By enabling online applications, cross-population of applicant data, and application stations on-site at health care provider locations, an estimated 18,000 uninsured children and their families as well as hospitals and 150 health departments across Virginia can now reap the benefits of their initiative."
KIDS Maintenance and Support	**California: Health Families Online Application** http://www.nascio.org/awards/nominations/2001California7.doc "The Medi-Cal Policy Institute, California HealthCare Foundation, and State of California have

developed the first Web-based application in the United States to enroll low-income children in public health insurance programs. Using any Web-enabled device, individuals and community-based organizations can enroll eligible applicants in California's Children's Health Insurance Program, called Healthy Families, and children and pregnant women in Medi-Cal, California's Medicaid program. The enrollment process will take 20-30 minutes, depending on the size of the family. Applicants receive a preliminary eligibility/program determination in real time, along with confirmation that their application has been received by the state."

Arizona: Health-e-Arizona
http://www.nascio.org/awards/nominations/2003Arizona4.doc
"Powering Arizona's online application is Health-e-AppSM, software developed on behalf of the California HealthCare Foundation (CHCF), a non-profit philanthropy, based in Oakland, California. Health-e-App was originally developed for use in California, where it was successfully pilot tested and implemented statewide under a license provided by CHCF to the State of California, at no cost. The California Department of Health Services is currently maintaining Health-e-AppSM for the State of California."

SEARCHS Maintenance and Support	**New Mexico: eChild** http://www.nascio.org/awards/nominations/2001NewMexico1.doc "The New Mexico Human Services Department partnered with Accenture to develop an Internet-based solution to enable parents and employers to perform tasks and exchange information that until recently could only be handled on the phone or in person with agency staff. Through the use of the Department's web site, http://childsupport.hsd.state.nm.us"
SEARCHS Modernization	**New Mexico: eChild** http://www.nascio.org/awards/nominations/2001NewMexico1.doc "The New Mexico Human Services Department partnered with Accenture to develop an Internet-based solution to enable parents and employers to perform tasks and exchange information that until recently could only be handled on the phone or in person with agency staff. Through the use of the Department's web site, http://childsupport.hsd.state.nm.us" **Washington: Child Support Internet Payment Service** http://www.nascio.org/awards/nominations/2003Washington3.doc "DCS needed to find a way to provide employers and parents with an easily accessible, easy-to-use method to remit child support payments electronically. The Child Support Internet Payment Service (CSIPS) was the solution. CSIPS is a Web site that provides employers and parents a convenient way to make electronic child support payments online, thereby saving time and money and improving payment accuracy and distribution timelines. CSIPS first became available to employers and individuals in August of 2001." **California: Child Support Automated System** http://www.nascio.org/awards/nominations/2009/2009CA6-Government%20to%20Government%20-%20DCSS%20-%20CCSAS.pdf "The goal of the California Child Support Automated System (CCSAS) Project was to create a single statewide Child Support system capable of providing high quality cost-effective services to California's demographically diverse and mobile population. Fully implemented, the system enables the State to aggressively pursue program performance goals making it easier for program partners involved with delivery of child support services to participate in enforcement activities." **Pennsylvania: Child Support Portal** http://www.nascio.org/awards/nominations/2010/2010PA2-PA%20-%20PA%20Child%20Support%20Portal%20-%20Digital%20Govt%20-%20Data,%20Info%20&%20Know.%20Mgmt.pdf "The answer to this problem is the Child Support Website (CSWS) and its related applications. The CSWS is more than a website – it is a suite of tools and applications. The CSWS includes a data repository optimized for reporting/inquiry, a secure web based application which can be accessed by child support customers and business partners, an interactive voice response (IVR) system which provides much of the same information over the phone and also makes outbound reminder calls for

upcoming appointments with Domestic Relations case workers, as well as a number of worker-facing reporting applications/ interfaces. This suite of applications provides customers with a comprehensive "one stop" information portal for 24x7 information delivery and customer service through the telephone or Internet."

Georgia: Georgia SHINES Child Welfare Automation System - LENSES Business Intelligence
http://www.nascio.org/awards/nominations/2010/2010GA7-NASCIO%202010%20Georgia%20SHINES%20-%20Final.pdf
"The Georgia Department of Human Services and the Division of Family and Children Services (DFCS) developed a robust, Web-based case management application to help the agency and its caseworkers enhance service delivery to children and families throughout the state. The new child welfare application replaces time-consuming paperwork and repetitive data entry to help the agency move toward higher performance by improving the quality and application of its data. The results have been remarkable and include improved coordination across the State, better services for children, greater effectiveness for staff and improved accountability to community stakeholders."

PROJECT TITLE	SIMILAR
PAB Records Access Management Project (RAMP)	**Nothing Similar**
Licensing Bureau Health Care Facilities Database	**Florida: Medical Quality Assurance Services Website** http://www.nascio.org/awards/nominations/2003Florida4.doc "Currently, MQA uses the Practitioner Regulation Application and Enforcement System (PRAES) to support tracking health care practitioner licensing, regulation, and profiling information. PRAES is a client server application that uses an Informix database. It is maintained by, and located at, the Department of Health (DOH). PRAES is an automated information system for internal agency use only. In order to increase services to MQA's customer base, MQA decided to lead the way in expanding public awareness of health care regulation. MQA resolved to deploy a web based services site to deliver services to licensees and disseminate information to the public."

WIC EBT	**Illinois: EBT Link System** http://www.nascio.org/awards/nominations/2003Illinois4.doc "In the early 1990s the Federal government passed the Welfare Eligibility Act, revolutionizing the way welfare benefits are distributed by the Federal government and administered by the states. As a provision within this act, states were given 10 years to implement electronic benefits transfer (EBT) systems. The agency responsible for carrying out this mandate in Illinois, the Department of Human Services (DHS), implemented EBT quickly, providing its benefit recipients with a model, high-tech program — access to goods and services with a simple swipe of a debit card. Illinois' EBT system is a model for other state programs as well as for guidelines set by the Federal government. Northrop Grumman Information Technology (IT) is the State's prime EBT contractor, providing reliable, efficient data processing, overall coordination and program management of EBT services for Illinois' food stamp program and five cash assistance programs, supporting over 490,000 cases per month."

PROJECT TITLE	SIMILAR
CHIMES-SNAP & CHIMES- TANF ELIGIBILITY SYSTEMS, ENTERPRISE ARCHITECTURE, AND FISCAL SERVICES	**Pennsylvania: COMmonwealth of Pennsylvania Application for Social Services COMPASS** http://www.nascio.org/awards/nominations/2003Pennsylvania4.pdf "COMmonwealth of Pennsylvania Application for Social Services, or COMPASS, is an object-oriented, web-based solution that provides online screening and applications for social service programs offered by the Commonwealth. Pennsylvania's COMPASS serves as a cross-department, single access point for a wide variety of offerings such as healthcare coverage, food stamps, cash assistance, and home and community based services. By using COMPASS, anyone can avoid a commute and long lines at a County Assistance Office and instead apply any time during the day or night from the privacy of a home, library, healthcare clinic, community center—or any location with Internet access."

Pennsylvania: Benefits without Barriers
http://www.nascio.org/awards/nominations/2005Pennsylvania3.doc
http://www.nascio.org/awards/nominations/2009/2009PA2-2009%20NASCIO%20-%20Cross%20Boundary%20Collab%20-%20COMPASS%20ht.pdf
"COMPASS was first released in August 2001 as an online application for Medicaid for Pregnant Women and Children and the Children's Health Insurance Program (CHIP). After 8 additional major releases, COMPASS has expanded to include applications for Adult Medicaid, Cash Assistance, Food Stamp benefits, Medicaid for Workers with Disabilities (MAWD), Family Works, adult Basic, Long Term Care, Home and Community Based Services, and the Low Income Home Energy Assistance Program (LIHEAP). It also provides a screening tool for people to determine if they are potentially eligible for services before they decide to apply. All areas of the application have been made available in Spanish and are fully ADA compliant to increase usability by all citizen groups. Only questions relevant to the selected services are presented to the user in the application and the screening processes. Data from submitted applications is transferred real-time to up to four different back-end systems in Pennsylvania, depending on the programs for which the user applied allowing for immediate access and processing by social services staff. "

Tennessee: Department of Human Services Family Assistance Center
http://www.nascio.org/awards/nominations/2005Tennessee3.pdf
"The Tennessee Department of Human Services (DHS) Family Assistance Service Center provides enhanced, expanded client services and improves government operations in the state's primary eligibility programs such as Temporary Assistance for Needy Families (TANF), Food Stamps, Medicaid and the federal Medicaid Waiver program (TennCare). The Family Assistance Service Center project provides toll-free telephone access for clients to request general and specific program eligibility information, verify case status, update case information, reschedule appointments with their case worker, explore complaints regarding case status, and process and file an eligibility appeal with the department's Division of Appeals and Hearings."

Utah: electronic Resources & Eligibility Product (eREP)
http://www.nascio.org/awards/nominations/2005Utah3.doc
"The state launched eREP with the debut of the Utah Cares web service in October 2003. Utah Cares provides a "screening of needs" and "referral" to both state services and community-based organizations for basic needs such as housing, food, childcare, transportation, and financial assistance information. Utah launched phase II, InfoSource, in April 2004. An online resource for citizens and caseworkers, InfoSource provides access to eligibility policy across TANF, Child Care, Food Stamp, and Medicaid programs. In August 2004, the state launched phase III of eREP, a pilot program designed to capture eligibility information for TANF and Child Care programs. The eligibility engine is powered by the Cúram Global Income Support module. Phase III has proved a success and Utah plans to expand the eligibility screening system to include Food Stamp and Medical services."

Alabama: Camellia Eligibility Tool
http://www.nascio.org/awards/nominations/2007/2007AL2-Camellia%20NASCIO%20award.pdf
"The Governor's Task Force to Strengthen Alabama Families, created through a grant from the Annie E. Casey Foundation to the state of Alabama, is a partnership of 28 members from public and private sectors. The task force includes the Commissioners of six (6) state agencies, representatives of health and human services, the Governor's Office, workforce and economic development, state legislators, family services centers and other community leaders. The team's mission is to redesign and strengthen health and human services to provide easily accessible, accountable and coordinated

public and private services, producing the best possible outcome for Alabama's citizens. Camellia I, the first in a series of eligibility projects by the task force, is a web-based tool that enables and empowers families to achieve self-sufficiency through a pre-screening eligibility tool. The walk-through wizard can be taken in the privacy of one's home or in a family services center with assistance from staff."

California: C-IV Providing Californians Accurate and Efficient Access to Health and Social Service Benefits
http://www.nascio.org/awards/nominations/2010/2010CA4-100602-G2C-C-IV.pdf
"The California Statewide Automated Welfare Systems (SAWS) Consortium IV developed and implemented the C-IV System. Originally created for a four-county consortium, the C-IV System now streamlines eligibility determination and processing for more than 2 million state welfare recipients in 39 counties and it is a clear example of how leading-edge technology can help government serve individuals and families more effectively. C-IV is the first fully implemented, integrated Web-based eligibility and welfare-to-work system in the country to use technology based on flexible, open standards. The open standards supported the transfer of C-IV to the State of Idaho in 2009, with no licensing fees. This install was one of the most efficient transfers of a public assistance system ever at one of the lowest costs."

Statewide Automated Child Welfare Information System (SACWIS) Replacement	**New Jersey: Adoption and Foster Care E-Recruitment Websites** http://www.nascio.org/awards/nominations/2001NewJersey8.doc "The Division of Youth and Family Services (DYFS) is New Jersey's child welfare agency serving families whose children have been exposed to abuse and neglect. In 2000 DYFS created and launched two integrated websites that promote the need to find foster and adoptive homes for children in New Jersey. These websites (www.njadopt.org and www.njfostercare.org) are now a major source of recruitment activity and information sharing for the citizens of the State of New Jersey. The two websites provide a wealth of information about the foster care and adoption program as well as the necessary steps to apply to become a foster care or adoptive parent applicant. The adoption site contains pictures, descriptions and videos of over 80 children that need adoptive homes. The foster care website contains narratives and quotes from foster parents as well as a fictitious foster child to give viewers a better understanding of the rewards of becoming a foster parent." **Nevada: UNITY** http://www.nascio.org/awards/nominations/2005Nevada3.doc "A comprehensive state-wide system supports all aspects of child and family services, eliminating the barriers that have impeded efficient, economic and effective delivery of child welfare services to troubled families." **Virginia: Systems Partnering In a Demographic Repository (SPIDeR)** http://www.nascio.org/awards/nominations/2006Virginia6.pdf "SPIDeR (Systems Partnering in a Demographic Repository) is a unique Web-based system developed by the Virginia Department of Social Services (VDSS) to improve efficiency, citizen service and support of localities. SPIDeR enables seamless data sharing between diverse government agencies at state, local, and federal levels through virtual system integration and 360 degree data sharing. SPIDeR was launched as a pilot in February of 2005 and implemented statewide in July of 2005."

CCUBS Maintenance and Support	**Texas: CLASSMate** http://www.nascio.org/awards/nominations/2010/2010TX7-2010%20CLASSMate%20-%20NASCIO%20Nomination%20final.pdf "The Texas Department of Family and Protective Services (DFPS) administers the Child Care Licensing (CCL) program which oversees the inspection and monitoring of over 36,000 Texas child care facilities to assure that they meet federal and state standards for the health, safety and well-being of the children under their care. Childcare Licensing Automated Support System (CLASS) is a system developed in 2002 that collects information regarding these inspections and stores it in a database used for review and monitoring of deficiencies and improvements." **Kentucky: Integrated Child Care System (KICCS)** http://www.nascio.org/awards/nominations/2009/2009KY5-2009%20NASCIO%20Recognition%20Awards_CHFS_KICCS_FINAL.pdf "In May 2008, Kentucky CHFS (Cabinet for Health and Family Services) implemented a new child care management application. This application, called Kentucky Integrated Child Care System (KICCS), replaced the child care management system that had been in use since 1998. KICCS has fully replaced the old system with a user-friendly, efficient, and reliable system that has created entirely new functionality and enhanced previous system capabilities."
MMIS Fiscal Agent Contract	**Nothing Similar**
MMIS Replacement	**Arizona/Hawaii: HAPA - Arizona PMMIS Alliance** http://www.nascio.org/awards/nominations/2002Arizona9.doc "AHCCCS is a statewide, managed care program with the vast majority of eligible [individuals] enrolled in managed care health plans. This differs from traditional fee-for-service Medicaid, where providers bill the State as services are rendered. A major component of program administration is the complex automated system to ensure that eligible persons can access the entitlement services. Arizona's system, which is the Prepaid Medical Management Information System (PMMIS) was initially implemented in 1991 and is operated by the State internally. At the time, PMMIS was the only statewide Medicaid Management Information System (MMIS) with strong managed care functions such as enrollment, capitation payment and encounter data processing. " **Massachusetts: How Massachusetts' NewMMIS Implementation has Improved State Operations** http://www.nascio.org/awards/nominations/2010/2010MA7-NewMMIS%20nomination%20-%20June%202%20Final_sbe-1.pdf ""When the NewMMIS project was launched six years ago, the Boston Globe dubbed it 'the scariest IT project in the state.' Massachusetts's Medicaid program serves 1.4 million members and is a major financial and operational stakeholder in state government. The sheer scope of the NewMMIS project required effective collaboration with all 16 agencies in the Executive Office of Health and Human Services (EOHHS), the state's Information Technology Division (ITD), the State Comptroller, and the Commonwealth Health Insurance Connector Authority. The enormous success we have achieved is due in large part to the way in which all of these stakeholders have come together to develop effective means of project management and governance to accommodate the complexities of state government, while meeting the needs of our consumers and health care provider partners. Our greatest achievement is our ability to harness our team's technical expertise across a diverse range of state agency partners." Secretary Dr.JudyAnn Bigby"

SAFETEA-LU repealed the Single State Registration System and the interstate exempt registration program and replaced it with a Unified Carrier Registration (UCR) Agreement under this act. It benefits any motor carrier, broker, freight forwarder or leasing company to comply with the federal law in their state of domicile instead of going to other states for compliance. The monies generated from this program, $2.4 million, are used to assist funding of Missouri's safety programs."

Texas: PK_16 Public Education Information Resource

http://www.nascio.org/awards/nominations/2003Texas6.doc

"The Texas Pre-kindergarten-16 Public Education Information Resource (TPEIR) is a multi-agency data repository managed by three state agencies: the Texas Education Agency, the Texas Higher Education Coordinating Board, and the State Board for Educator Certification. The TPEIR project provides stakeholders in education – including citizens (students, parents), administrators, educators, state leadership, researchers, and professional organizations – with ready access to integrated public primary, secondary, higher education and educator credential information for purposes of research, planning, policy, and decision making."

Indiana: Accountability System for Academic Progress

http://www.nascio.org/awards/nominations/Innovative-IN-IndianaAccountabilitySys.pdf

"The Indiana Department of Education's ASAP (Accountability System for Academic Progress) Web site is an interactive tool that assists school communities in making informed decisions concerning student achievement and school performance. The site merges state and NCLB requirements, academic standards, instructional resources, and a wide range of demographic and assessment data into an interface that is easy to use and completely accessible to the public. Users can disaggregate the information, graphically display the results, and compare schools based on multiple data points."

North Carolina: Department of Public Instructions NCWISE Wave 2

http://www.nascio.org/awards/nominations/2007/2007NC10-NC%20WISE%20Wave%202%20Nomination%20V2.pdf

"The North Carolina Department of Public Instruction (NC DPI) initiated the Wave 2 deployment of its North Carolina Window of Student Education (NC WISE) in 2006. The NC WISE program is an electronic student information system that provides student and school information management capabilities through the Internet and constitutes a $200+ Million investment in education technology by the State of North Carolina. NC WISE supports the data analysis and reporting requirements of education initiatives such as the North Carolina ABCs of Publics Education accountability program, the Uniform Education Reporting System (UERS), Closing the Achievement Gap and the various programs and requirements of the No Child Left Behind Act. NC WISE offers unprecedented opportunities for local educators to use technology to help them make better instructional and business decisions in their schools."

Michigan: K-20 Improvement Project

http://www.nascio.org/awards/nominations/2010/2010MI2-Data%20info%20%20knowlede%20mgmt%20-%20k-20%20project%20final.pdf

"In Michigan only 37% of our population aged 18 – 24 enrolls in post secondary education, far below the national average of 48%. Michigan leaders realized student achievement is tied to economic development. This is critical since the unemployment rate in Michigan has been the highest in the nation for 45 consecutive months thru 2009. A large part of Michigan's strategy to reverse this trend is to better prepare students and displaced workers with the education and skills needed for jobs in the 21st century. To this end, Michigan has embarked upon the K-20 improvement project. This is an integrated project shared across multiple state departments aimed at increasing educational achievement. The key to holding Michigan accountable for turning our educational investment into jobs is equipping educational policy makers and institutions with data. We must improve how we measure outcomes and use this data to attract prospective employers. The K-20 improvement project relies on a data and knowledge management strategy that focuses on three core elements: (1) Expand our data systems used to collect and report on student outcomes, (2) Simplify access to education and training for displaced workers and (3) provide an Internet strategy to simplify college admissions, college transfers and tuition assistance."
